DevOps & Tools
Git, IIS, cPanel, VPS hosting, Postman, Electron

CMS
WordPress, Contact Form 7, React-to-WordPress

LANGUAGES

Bengali — Native
English — Professional

PROFILE

Full stack software engineer with 4+ years building enterprise and SaaS applications on ASP.NET / .NET Core, Angular and relational databases. I maintain and modernize production HR, performance and billing systems for a large Bangladeshi conglomerate, and freelance on CRM, warehouse and web projects for international clients — from database and API to UI, reporting, deployment and support.

EXPERIENCE

Programmer
Apr 2023 – Present

Square InformatiX Ltd. (Square Group) · Dhaka

- Develop and maintain enterprise HR, recruitment, performance, billing and document systems used across Square Group companies (ASP.NET MVC, AngularJS, Oracle, SQL Server).
- Leading the HRMS migration to Angular (standalone, signals) and .NET Core, including JWT authentication, the navigation shell and leave modules.
- Built a payslip API for Square Group's mobile app on .NET 6 with stored-procedure-driven data access.
- Delivered overtime planning and approval, Excel upload/paste data entry and FTP file transfer.
- Build Crystal Reports and RDLC reports; own IIS deployments, environment config and database connection-pool fixes.
- Provide day-to-day debugging and support for production users.

Freelance Full Stack Developer
Dec 2025 – Present

International clients · Remote

- Building a SaaS CRM on Angular, Supabase, Go and Clerk: contact and account management, an email-analytics dashboard (Chart.js, NgRx Signal Store) and a drag-and-drop widget dashboard.
- Built warehouse-management features: OData-filtered wave selection, shortage reporting and on-time-delivery charts.
- Built WordPress landing and service pages for a Microsoft Dynamics consultancy, including an interactive savings simulator and Google Tag Manager tracking.

Java Developer
Jun 2022 – Feb 2023

Quantsys · USA, Remote

- Developed and debugged backend services with Java, Spring Boot and MySQL; tested APIs with Postman.

EDUCATION

B.Sc. in Computer Science & Engineering
Bangladesh Army University of Science and Technology (BAUST), Saidpur
2018 – 2022 · CGPA 3.56

HSC, Science
Police Lines School & College, Rangpur
2017 · GPA 5.00

ACADEMIC STRENGTHS

Image Processing, Signal Processing, Machine Learning, Data Mining, Python, MATLAB

CERTIFICATION

Certificate in Computer Application (Grade A+) — Dept. of Social Services, Govt. of Bangladesh, 2015

ACTIVITIES

- Organizing committee lead, Course Completion Ceremony (6th & 7th batches), BAUST
- Member, BAUST Programming Club

SELECTED PROJECTS

Enterprise Systems — Square Group

- **HRMS** — leave, attendance, overtime, performance and reports; migrating to Angular + .NET Core.
- **RMS** — end-to-end recruitment from admin to candidate.
- **VERDICT (PMS)** — balanced-scorecard performance reviews.
- **CBPS** — bill processing, vendor selection and LC handling.
- **E-DMS** — secure, role-based document management.

Products — NSoftBD

- **Zolojog** — team chat, tasks, social feed and family planning in one app.
- **FixDeskBD** — IT helpdesk SaaS with SLA timers, asset records, Bangla/English UI (Node.js, MySQL).
- **ShipKoro** — order, courier, fraud-check and COD management for Facebook sellers (.NET).
- **Velox Lifestyle** — e-commerce site with admin panel (Angular, Node.js).

Academic

- **Real-Time Driving Assistance** — pedestrian detection with driver alerts.
- **Hand Gesture Recognition** — real-time detection toward sign language.
- **Crime Probability Detection** — prediction from 100 years of station data.
